

# MAGLATCH™ CUSTOM POWER SUPPLIES

Steel Enclosure With LEDs & Test Button(s)

Easy-To-Read Terminal Strips Include Numbers & Labels

All MAGLATCH power supplies include full schematics and wire-runs within the inside cover

### How Does It Work?

Securitech MAGLATCH Power Supplies provide power and special operating features to meet almost any need. Custom models can be created based upon the end-user's requirements.

Complete Control For Electromagnetic Lock & Electrically-Released Trim

- Easy Connection To Intercom Or Card Access Systems
- Individual Transformers For Electromagnetic Lock And Electric Control Trim
- LEDs Indicates Component Status For System Check; Individual LEDs For Electromagnetic Lock & Electric Release
- Test Button For Fast Service; Helps Determine Location Of Problem; Indicates Whether Lock Or Intercom Serviceman Is Needed
- Single Door Or Two-Door Models For Vestibules With Locked Inner & Outer Doors
- Optional Two-Door Timer For Locations With A Single Intercom Panel
- Low Voltage Terminals Fully Labeled For Easy Connection
- Standard Or Customized Systems To Work With All Maglatch Models
- Optional Fire Alarm Control Panel Tie-In (When Required By Code)
- Easy Hard-Wire Connection - 110vAC Required At A Single Point
- Conduit Knock-Outs On Box
- 12 Gauge Steel Housing With Hinged Cover
- Optional Key Lock
- Optional Programmable Timers & Door Hold Open Alarms
- Multiple Input Options (Voltage Or Signal)
- Optional Output To Alarms Or Access Control Systems For Request-To-Exit Signal
- Optional Battery Back-Up
