

**Electromagnetic Locks**  
*Innovation With Easy Installation*

**INVISALOCK™**

**#IL1002**  
INVISALOCK #1002 available for use with MAGLATCH Systems (Included in #9030). Available individually for special locking needs

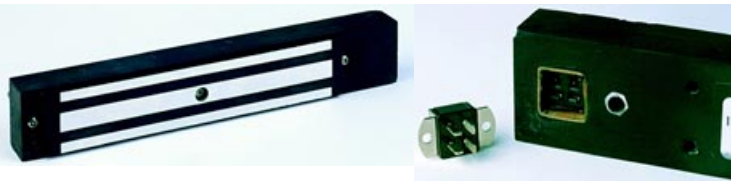

Sleek Design & Outstanding Performance

- **1,200 lb. Holding Force**  
Security & Vandal-Resistance
- **Narrow Projection & Shallow Height**  
Provides Greater Headroom & Neater Appearance
- **Built-In Transient Suppression System**  
For Component & Circuit Protection
- **One Piece Housing Cover**  
Easy Installation
- **Low Current Draw**  
Only 1/4 amp at 24vDC
- **Optional MAGCHANNEL**  
Conceals Electromagnet & Eliminates "Z-Brackets"
- **10 Year Limited Warranty**

**ADDITIONAL MODELS**

**#IL1010 INVISALOCK QC**

Special "QuickConnect" allows replacement of an electromagnetic lock without touching a wire.

**#IL1008 INVISALOCK MAX**

14" long model with wires exiting from side

**Standard Dimensions**

Length:	12-1/2"
Height:	2"
Depth:	1-13/16"

Delayed Egress model is slightly longer

**Electrical Information**

Voltage:	24vDC
Current Draw:	290mA
Resistance:	82 Ohms

**Wiring Connections**

Magnet Power	Blue (2)
Magnetic Bond Sensor	Door Status Switch
Red N/C	Red N/C
White N/O	White N/O
Green Common	Black Common

Switch positions are with door closed

**DELAYED EGRESS ELECTROMAGNET**

Self-contained electromagnet meets NFPA 101 requirements. Easy-to-install with multiple inputs and outputs for fire alarm control, sirens, cctv, etc. See opposite side for complete information.

**OPTIONS**

**-MBS Magnetic Bond Sensor**  
2 SPDT magnetic reed sensors within electromagnet monitor security status by verifying bonding between magnet and armature.

**-DSS Door Status Switch**  
1 SPDT magnetic reed switch within a plastic case is fastened to one end of the magnet, and concealed within the cover. Senses open and closed door position.

Other options (indicator LEDs, security fasteners, tamper switches, motions sensors and piezo alarms) available upon special request.
