

SINGLE DOOR ALARM

Independent Alarm For
 Emergency Exits
 & Other Areas

- AC Powered
 Cannot Be Disabled By Removing Battery
- 110 Db Siren
 Protected Within Power Supply/Alarm Unit
- Amber Strobe
 100,000cp Peak, Polycarbonate Dome
- Hidden Door Contact Switch
 Does Not Require Special Door Prep
- Key Switch Box For Alarm Shunt/Reset
 (Requires Mortise Cylinder By Others)
- Battery Back-Up For Power Supply
 GelCel Charging Battery
- DPA Option
 Sounds Alarm If Door Is Propped Open
- 85db Siren Option
 Lower Volume Series (If OSHA Required)

How Does It Work?

SDA 100 series alarms overcome the inherent weakness in door mounted alarms or alarms integrated within the panic device or emergency exit lock.

SDA alarms are installed above the door frame, not on the door, for maximum vandal-resistance. Employees cannot remove a 9volt battery to defeat the alarm.

Emergency exits and other doors cannot be opened without sounding an alarm, unless shunted by use of the key switch.

SUGGESTED APPLICATIONS

- **Employee Work Areas With High Traffic**
 Prevent Unobserved Exiting & Entries
- **Sensitive Document & Storage Rooms**
 Prevent Unobserved Material Removal
- **Perimeter Emergency Exit Doors**
 Prevent Smokers From Breaching Security By Opening Doors To Smoke

ELEMENTS

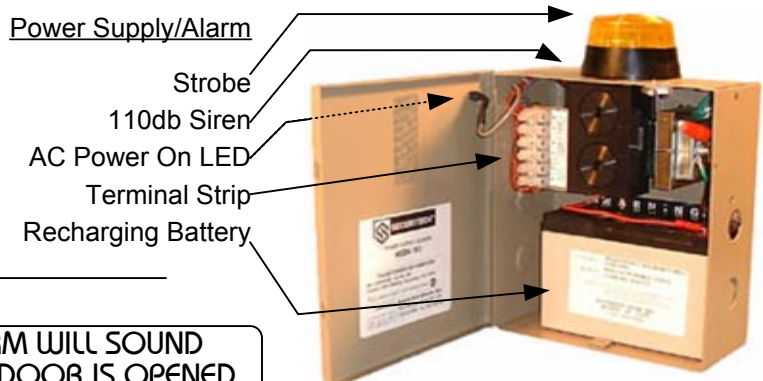

Alarm Door Contact
 Provides Door Position Signal

Alarm Shunt Switch
 Requires mortise cylinder with "Yale" cam (by others)

Door Sign

ALARM WILL SOUND WHEN DOOR IS OPENED
