Request-To-Exit Button Silences  
 Alarm When Re-Entering

Special Wiring Not Required

Ideal For  
 Retail Locations  
 Sensitive Areas

OPTIONAL OUTPUTS:

- REMOTE SIREN OR LED
- ELECTRIC DOOR RELEASE

**How Does It Work?**

- Need:** *Retailer has door in path of emergency exit. Door typically leads to stockroom, bathroom or break area.*
- Goal:** *To prevent unauthorized travel through door and sound alarm if door is used without authorization.*
- Operation:** *Entering valid code on keypad silences alarm for one usage. Push-button on unlocked side silences alarm for one usage.*
- Bypass:** *Enter bypass code to disable alarm for extended period (Field adjustable), or use optional keyswitch. Used for deliveries, etc.*

**#SDKA-125 ELEMENTS**
